

PRODUCT INFORMATION

PRO CARE HIGH PERFORMANCE GREASE

Description

High Performance Grease is high pressure and temperature grease with very good adhesion properties on a mineral oil basis for extreme long-term loads.

Benefits

- Extremely pressure absorbent and resistant to high loads
- Extremely adhesive and centrifugal force-resistant
- Water and wastewater-resistant
- Resistant to hot and cold water
- Very good corrosion protection characteristics
- Ideal for reducing inventory
- Have a temperature range of -30 °C to +160 °C

Application

- Long life lubrication in all machinery and car assembly fields: in the open air and when wet, when dusty and when subject to vibration, impact or high pressure
- In shipbuilding, harbours, dockyards, locks and in water
- At high temperatures: in autoclaves, fans, ovens, guide wheels, guides and joints
