

PRODUCT INFORMATION

PROCARE BRAKE CARE

Description

Brake Care is a powerful-bond inspection and repair special lubricant for the entire brake, chassis and bodywork areas. Prevents contact corrosion. Long retention on the lubrication point thanks to good resistance to splash water and salt water.

Benefits

- Excellent resistance to pressure and temperatures
- Drip-free even at high temperatures
- Excellent corrosion protection
- Prevents contact corrosion
- Prevents brakes squeaking
- Outstanding damping properties
- Very strong adhesion, thus high degree of resistance to salt and spray water

Application

- When repairing disc and drum brakes
- For keeping various door catch mechanisms, such as arrestors or rollers, running smoothly
- Fittings in the high-temperature area, such as on exhaust systems

Instructions

Apply special lubricant with the brush can onto the previously cleaned area.

Notice

! The product is immediately resistant, as it is applied without any solvents at all.

! Do not apply to brake lining friction surfaces and brake discs.

! Do not use to lubricate brake pistons or gaskets.

VOLUME

200 ml

PACKAGING

12 Pcs.
